## LAAS MEETINGS

General Meeting - Monday, September 10th, 7:45 p.m. at Griffith Observatory. This is our first general meeting of the fall season. The speaker will be Steve Edberg of the San Fernando Solar Observatory. He will speak on "Solar Observations and Observatories".

Board Meeting - Monday, September 24, 7:30 p.m.

Star Members - Monday, September 17, 7:30 p.m.

Star and Board meetings convene at the Palms Recreational Center, located on Overland Avenue, just north of the Santa Monica Freeway. All members are welcome.

## TOUR

Our September speaker, Steve Edberg, has arranged for the LAAS to see the San Fernando Solar Observatory. This observatory, located near the Van Norman dam in the San Fernando Valley, was originally built by Lockheed.

The tour will take place Saturday, October 13th. All members are welcome. We will meet near the corner of San Fernando Road and Sepulveda Blvd. at 14041 San Fernando Road. This is a gate where we will get access through DWP property. We must all be there at 1:00 p.m. The time is important because the gate will only be opened once to let us through as a group.

## SEPTEMBER VOTE

The club can have non-profit status from the IRS if we make a change to our Articles of Incorporation. A vote will be taken on this at the September meeting. Essentially the change will mean that if the club ever dissolves, it's assets must be donated to other non-profit organizations rather than be divided up among the members. The Board strongly feels we will benefit from the non-profit status.

## STAR PARTY

The September Star party will be Saturday, September 22nd up at Lockwood Valley. Other star parties: October 20th.

NEWS NOTES

The Board has voted to raid the treasury and pay off the mortgage on the Lockwood Valley land. --- Your bulletin editor retires with this issue and no replacement has yet been found. Several months might go by before there is another bulletin. Keep this one for reference to the tour and star party dates. Remember that the general meeting is always at Griffith on the second Monday of each month.

CLASSIFIED

For Sale: 8 inch Cave Astrola f/8 reflector, like new. Cave mount with clock drive and electric slo-motion declination. 3 eyepieces + barlow. \$495.00. Call Gary (213) 368-5028 or work phone: 829-7511 EXT 3597.
